## A national **brand** of international **quality**

Serving within Turkish Medical Industry since 1983, Yüce Medical Supplies has established a gauze production, folding and packaging facility at the beginning of 2007 in Şanlıurfa Organized Industrial Estate / Turkey.

Our company has met and complied with all compulsory EU legislation, and CE requirements regulated via Law No: 4703, then inspected by CE Notified Body No 2764, passed all tests with great success and certified with BS EN 14079 European Standard, ISO 9001 Quality Management System, EN ISO 13485 Quality Management System for Medical Devices and CE 2764. We have also been passing the routine and regular inspections after obtaining those certificates. At the end of 2008, Yüce Medical Supplies has established cotton cleaning

and hydrophilic cotton production lines for its own usage.

In addition to producing enough cotton yarn to meet the needs, it has also been fully integrated by commissioning hydrophilic cotton production lines. Our company, which has made brand agreements with some well-known companies over the world, added new products to its portfolio such as gauze, sponge, gauze pads, roll cotton, dental cottons, ear pads and sterilization rolls to its product range with its 250 employees and 25000 m2 closed area.

Our company, which has been operating in the health sector since 1983, was introduced to the production of gauze products in 1997. As of the end of 2008, our company has started trial production for the hydrophilic cotton products. Our facility, which has undergone a rapid revision since 2007, met and complied with all compulsory EU legislation, and CE requirements regulated via

Law No: 4703, then inspected by CE Notified Body No 2764, passed all tests with great success and certified with BS EN 14079 European Standard, ISO 9001 Quality Management System, EN ISO 13485 Quality Management System for Medical Devices and CE 2764. We have also been passing the routine and regular inspections after obtaining those certificates.

Our company, obtains sterile and non-sterile production authorizations and carries out its production in 3 stages:

- In the 1st stage, yarn production from cotton with the thread number between 20/1 and 40/1 that meets the needs of our facility.
- In the 2nd stage, production of gauze between 16-24 threads by weaving, bleaching, packaging processes.
- In the 3rd stage, fully automatic, untouched, sterile and non-sterile sponges, pads, gauze compresses in different sizes and layers are produced and packaged in class I-II-III regions. Our facility with 250 employees and 25000 m2 closed area, serves to Turkey and worldwide, continues to be the production base of major brands with its exportation and outsource manufacturing to many companies. Our company has expanded its market share and service area with new products added to its portfolio in 2020. 2020 yılında ürün yelpazesine kattığı yeni ürünlerle Pazar payını ve hizmet alanını genişletmiştir.

# GAUZE

Weaving of warp thread made of cotton

It has a wide range of usage from small operations to large surgical operations.

#### Folding Types:

- It is produced in various sizes, in a way that the edges do not give thread, untouched, by folding in automatic machines.

#### Properties of The Material

- It is clean, spotless, odorless
- It must be hydrophilic.

#### Physical and Technical Properties:

- 100% Natural Cotton
- Air purged
- With No Particulate Structure
- High Absorbency
- Recycled
- Processed Product
- Evenly Weaved
- Suitable for Sterilization Techniques

#### Packaging:

- Sterile Packaging
- Non-Sterile Packaging
- Paper Wrapped Non-Sterile and Sterile Packaging
- Blister Packaging

## PRODUCTS MADE OF GAUZE

**Gauze Compress:** It is produced from hydrophilic gauze in a square and rectangular cut, in a way that it does not give free fibers from the edges, by folding between 8-24 ply, seamless.

**Laparotomy Sponge:** It is produced from 100% gauze, optionally with loop, borders and X-Ray thread (single, double or triple), 4-8-12-16 ply, 8x18, 30x30, 40x40, 45x45 cm in sizes.

**X-Ray Thread:** It is a highly resistant material whose raw material is Barium Sulphate (BaSO), it does not deform when exposed to heat or moisture. Gauze goes into weaving with X-Ray thread.

**Gauze Bandage:** It is produced by 100% cotton yarn, bleached and hydrophilic, 20 thread, 5-7-10-15-20 cm wide.

**Eye Pad:** It is produced from 100% gauze cotton in oval cut, 6-7,5 cm in size.

# COTTON

Cotton is one of the most important crops in the world. It has been cultivated for over 5000 years and has been transformed into useful products thanks to its natural properties. It is used from clothing to towels, upholstery, covers, medical hydrophilic gauze and cotton wool. Today, half of the world's cotton is carefully collected by hand to ensure product quality. Absorbent cotton wool is obtained from high quality, blended natural cotton purified from foreign matter and foreign fibers. It is extremely clean and absorbent and does not contain any harmful substances to human health.

### ZIG-ZAG HYDROPHILIC COTTON:

DEFINITION	Hydrophilic Cotton
SHAPE	Zig Zag Folded
UNIT WEIGHT	50Gr, 100Gr, 200Gr, 500Gr
RAW MATERIAL	%100 Cotton
HUMIDITY	Max %7
WATER ABSORBTION CAPACITY	Min 23 Grs

### ROLL HYDROPHILIC COTTON:

DEFINITION	Hydrophilic Cotton
SHAPE	Wrapped Cotton Roll
UNIT WEIGHT	250 Grs, 500 Grs, 1000 Grs
RAW MATERIAL	%100 Cotton
HUMIDITY	Max %7
WATER ABSORBTION CAPACITY	Min 23 Grs

### PRE-CUT COTTON

DEFINITION	Hydrophilic Cotton
SHAPE	İntermittent Cut
UNIT WEIGHT	100 Grs
RAW MATERIAL	%100 Cotton
HUMIDITY	Max %7
WATER ABSORBTION CAPACITY	Min 23 Grs

### GENERAL SIZE OF COTTON

BALE SIZE	560 X 980 X 1000
40'HC CONTAINER	116 Bales
40' CONTAINER	96 Bales
TRUCK	128 Bales

### COTTON PAD:

- It is produced from gauze and cotton in sizes of 10 cm x 15 cm, 10 cm x 30 cm 10 cm x 25 cm, 12 cm x 24 cm, 20 cm x 10 cm and be produced in other desired sizes.

### DENTAL COTTON:

- It is produced from 100% hydrophilic cotton in various sizes (No: 1, 2 ve 3).

### MAKEUP REMOVAL COTTON:

- It is produced from 100% hydrophilic cotton for Daily make-up removal for sensitive skins.

### COTTON BUD:

- It is packed in round and square boxes in refill and blister packages by fully automatic machines.

# STERILIZATION ROLL

Designed as a packaging solution in sterilization applications, Yüce Steripack sterilization rolls provide safe barrier systems for sterile protection and use of medical equipments. Yüce Steripack sterilization rolls are manufactured from medical paper and laminated film (PET / PP), comply with ISO 11140-1 and EN 868-5 standard. It has a Steam and Ethylene Oxide indicator on it, allowing a successful sterilization process to be distinguished with a clear and precise color change. With its standard- corrugated and different usage options, Yüce Steripack sterilization rolls facilitates the selection of suitable packaging for your medical supplies.

## STERILIZATION ROLL:

Yüce Steripack rolls with 3-stage edge welded, 5-40 cm wide, superior barrier property 60-70 gram medical kraft paper, providing free opening without tearing, clear and precise steam-EO indicator color change, are produced in Class II zones. The product can be easily seen in the packaging with its transparent, multi-layer, co-polymer film structure.

## STERILIZATION BAG:

Yüce Steripack rolls with 3-stage edge welded, 5-40 cm wide, superior barrier property 60-70 gram medical kraft paper, providing free opening without tearing, clear and precise steam-EO indicator color change, are produced in Class II zones. The product can be easily seen in the packaging with its transparent, multi-layer, co-polymer film structure.

## PATIENT AND VISITOR GOWNS

Gowns made of PP Spunbond fabric are used to reduce the risk of infection and to create a layer of protection for patients against contamination.
